WELDING TABLE PROVIDES FAST AND PRECISE OPTIONS FOR MACHINING A SIMPLE 2D-CONSTRUCTION (BUILDING OF RAILINGS), BUT ABOVE ALL, PRECISE WORK ON OBJECTS WITH A LARGER NUMBER OF DIMENSIONS. IN ADDITION TO THE SIMPLIFIED PRODUCTION OF INDIVIDUAL ITEMS, IT ALSO HAS THE ADVANTAGE IN SERIAL PRODUCTION. TIME-CONSUMING WORK, SUCH AS MEASUREMENT AND EXACT ANGLE ARRANGEMENT OF INDIVIDUAL PARTS IS SIGNIFICANTLY SIMPLIFIED AND REPRODUCIBLE.

OUR PRODUCTS ARE USED IN ALMOST EVERY BRANCH OF INDUSTRY - MAINLY IN MACHINERY, CONSTRUCTION, METAL AND AUTOMOTIVE.

GET THE ADVANTAGE OF WELDING TABLES BY MAKING PRECISE CONSTRUCTIONS IN A MUCH SHORTER TIME.

ALL OUR TABLES ARE ENTIRELY PRODUCED IN POLAND!

WE HAVE A HUGE EXPERIENCE WHICH ALLOWS US TO ADJUST THE PRODUCT TO THE CUSTOMER'S REQUIREMENTS.

ADVANTAGES AND BENEFITS OF MODULAR TABLES

PERFECT FLATNESS - thanks to the adjustment of the height of the countertops by means of spacers, the operator can set the perfect working surface of the table.
Each surface of each plate be milled

OPEN-MOUNTED ASSEMBLY OF THE TOOLS - there are openings in the SYSTEM 28 in the table (Ø 28 in a 100x100mm grid).
Our solution is compatible with the majority of tools which come from

our competitors also operating in this system. For easier assembly of the holes, standard holes are made with a phase or a radius. They can be made on both sides with the possibility of turning each table top.

ADJUSTABLE PLATES - we can move them by increasing the working surface, as well as exchanging them for new ones, which affects the various adaptation of the table to the currently performed works and longevity of use.

MODULAR ENLARGEMENT OF WORKING AREA -

we obtain it by quickly joining together many tables in table sets, in different directions directly or by means of connectors, standard or telescopic with length regulation. The operator has the ability to adjust the arrangement of tables depending on the current location in the production hall.

In case there is a need for more positions in a simple and quick way, we can divide individual sets of tables into individual positions.

ADJUSTABLE TABLE HEIGHT - range from 850mm to 1150mm, stroke every 50 mm. The possibility of adapting the station to your needs, which affects the ergonomics of work for many operators!
